

Engineering Construction Activity Data

Background

The Civil Contractors Federation National (CCF) sources data on engineering construction activity from the Australian Bureau of Statistics (ABS). ABS is Australia's national statistical agency, providing official statistics on a wide range of economic, social, population and environmental matters. CCF National analyses and re-produces this data to obtain a better national picture of engineering construction activity in the civil infrastructure sector. Further information can be obtained at www.abs.gov.au

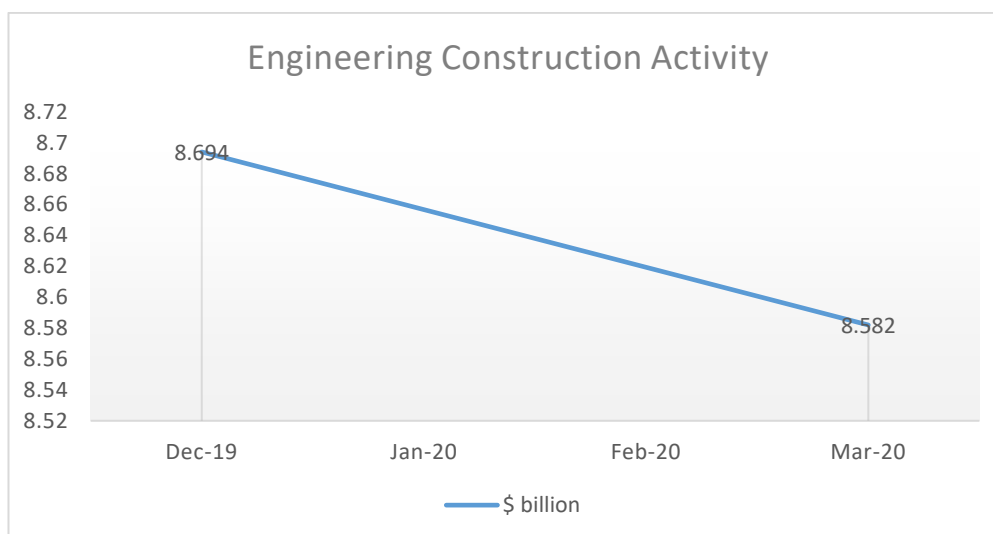

Engineering Construction Activity

Engineering Construction Activity is a publication which provide estimates of value of engineering construction work done, commenced and yet to be done.

Key Points

- Public sector engineering construction totalled \$8.694 billion in the December quarter 2019 (seasonally adjusted) which represents an increase of 0.5% from September quarter 2019 to December quarter 2019 and a fall of -0.8% from December quarter 2018 to December quarter 2019.
- Public sector engineering construction totalled \$8.5 billion in the March quarter 2020 (seasonally adjusted), which represents a fall of -1.2% from December quarter 2019 to March quarter 2020 and an increase of 2.5% from March quarter 2019 to March quarter 2020.

Engineering Construction Activity – December 2019 - March 2020
